

SUSTAINABILITY PLEDGE

At Taylor Hart Ltd we recognise the importance of sustainable development within our business, and are dedicated to controlling and minimising the effects we have on the environment. Therefore we strive to continually improve our environmental performance to meet our present business needs without compromising our long term future environment.

We have a firm set of environmental objectives providing a dedicated approach to sustainability in areas such as legislation, waste, training and recycling.

Fully accredited to ISO 14001:2015 we can demonstrate these processes and also evaluate any environmental impacts that may result from our activities, products and services.

- We monitor and comply with relevant legislation.
- Implement training programmes for our staff.
- Strive to improve our energy efficiency.
- Continually monitor waste produced from site.
- Utilise off site production to minimise and re-use off cuts of product
- Minimise the use of natural resources and recycle where appropriate.
- Provide emergency planning and pollution prevention controls.
- Work closely with our accredited British Standards to develop programmes and systems to monitor our environmental impacts.

Taylor Hart Ltd takes a close and responsible interest in the environmental impacts on all projects in which the company is involved.
